

THE EXCHANGE & 2BELOW

TOP TEN ENVIRONMENTAL STEPS

Composting Food Waste and Recycling Plastics, Glass, Aluminum, Cardboard, and Paper can keep up to 90% of our waste out of landfills.

Our Energy Star Equipment Pieces are 30-40% more efficient than conventional models.

Our walk-in coolers have been fitted with Strip Curtains, so each saves enough electricity to power a residential home for an entire year.

Over 44% of our main dishes are Vegetarian or Vegan, which require significantly less energy and water to produce than meat-based dishes.

Across both locations, our Low-Flow Aerators and High-Efficiency Sprayers save enough water to fill over 80 backyard swimming pools per year.

Our Hot Cups, Cold Cups & Lids, Cutlery, Take-Out Containers & Lids, and Plates are made with bio-based materials that can be commercially composted.

Our Touchless Sensor Restroom Faucets improve hygiene while conserving water and energy.

The nearby Bike Racks help promote cleaner transportation alternatives for our guests and staff.

By offering Reusable Dishware, we keep waste out of landfills and conserve natural resources.

Our facilities are Styrofoam Free, which keeps harmful chemicals and litter out of our environment.
